

HLA Standard Library Reference Manual

1	Passing Parameters to Standard Library Routines	1
1.1	Parameter Passing	1
1.2	Passing Parameters by Reference and by Value	2
1.3	Passing Byte Parameters on the Stack	3
1.4	Passing Word Parameters on the Stack	5
1.5	Passing DWord Parameters on the Stack	5
1.6	Passing QWord Parameters on the Stack	6
1.7	Passing TByte Parameters on the Stack	7
1.8	Passing LWord Parameters on the Stack	7
2	Command-Line Arguments (args.hhf)	9
2.1	The Args Module	9
2.2	Retrieving the Command Line	9
2.3	Argument Count and Item	10
2.4	Deleting Command Line Arguments	11
2.5	Argument Iterators	12
3	Arrays Module (arrays.hhf)	15
3.1	The Arrays Module	15
3.2	Array Data Types	15
3.3	Array Allocation and Deallocation	16
3.4	Array Predicates	17
3.5	Array Element Access	17
3.6	Array Operations	18
3.7	Lookup Tables	22
4	Bit Manipulation (bits.hhf)	25
4.1	Bit Module	25
4.2	Bit Counting Function	25
4.3	Bit Reversal Functions	26
4.4	Bit Merging Functions	28
4.5	Bit Extraction Functions	30
4.6	Bit Distribution Functions	32
5	The Blobs Module (blobs.hhf)	35
5.1	Conversion Format Control	35

5.2	Blob Synopsis	35
5.3	Blob Internal Representation	36
5.4	Declaring Blob Variables	36
5.4.1	Initializing and Allocating Blob Variables	37
5.5	Blob Accessor Functions	39
5.6	Blob Assignment Functions	42
5.7	Blob Extraction Functions	44
5.8	Blob Comparison Functions	45
5.9	Blob Scanning Functions	45
5.10	Blob Concatenation Functions	48
5.11	Blob Conversion Functions	51
5.12	General Blob I/O Functions	53
5.13	Blob Binary I/O Routines	55
5.14	Blob Output Routines	63
5.15	Blob Input Routines	64
6	Character Classification and Utilities Module (chars.hhf)	65
6.1	Conversion Functions	65
6.2	Predicates (Tests)	66
7	Console Display Control (console.hhf)	73
7.1	The Console Module Module	73
7.2	Cursor Positioning Functions	73
7.3	Console Clearing Functions	76
7.4	Character Insertion/Removal Functions	78
7.5	Console Scrolling	80
7.6	Console Output Colors	81
8	Conversions (conv.hhf)	83
8.1	Buffer vs. String Conversions	83
8.2	Conversion Format Control	84
8.2.1	Underscore Control	84
8.2.2	Delimiter Control	87
8.3	Hexadecimal Conversions	91
8.3.1	Internal Routines	92
8.3.2	Hexadecimal Numeric Size Functions	92
8.3.2.1	Fixed Size Hexadecimal Size Functions	92
8.3.2.2	Standard Hexadecimal Size Functions	96
8.3.3	Hexadecimal Numeric to Buffer Conversions	101
8.3.3.1	Fixed Length Hexadecimal Numeric to Buffer Conversions	101
8.3.3.2	Variable Length Hexadecimal Numeric to Buffer Conversions	108
8.3.4	Hexadecimal Numeric to String Conversions	115
8.3.4.1	Fixed-Length Numeric to Hexadecimal String Conversions	115
8.3.4.2	Variable-Length Numeric to Hexadecimal String Conversions	130
8.3.5	Hexadecimal Buffer to Numeric Conversions	146
8.3.6	Hexadecimal String to Numeric Conversions	151
8.4	Signed Integer Conversions	157
8.4.1	Internal Functions	157
8.4.2	Integer Size Calculations	157

8.4.3	Signed Integer Numeric to Buffer Conversions	161
8.4.4	Integer Numeric to String Conversions	167
8.4.5	Signed Integer String to Numeric Conversions	182
8.5	Unsigned Integer Conversions	192
8.5.1	Internal Routines	193
8.5.2	Unsigned Integer Size Calculations	193
8.5.3	Unsigned Integer Numeric to Buffer Conversions	197
8.5.4	Unsigned Integer Numeric to String Conversions	203
8.5.5	Unsigned Integer String to Numeric Conversions	219
8.6	Floating Point Conversions	229
8.6.1	Exponential Floating-Point Conversions	229
8.6.2	Floating Point Numeric to Buffer Conversions, Exponential Form	230
8.6.3	Floating Point Numeric to String Conversions, Exponential Form	232
8.6.4	Floating Point Numeric to Character Conversions, Decimal Form	236
8.6.5	Floating-Point Numeric to String Conversions, Decimal Form	240
8.6.6	Floating Point String/Buffer to Numeric Conversions	244
8.6.7	Roman Numeral Conversion	245
9	Coroutines Module (coroutines.hhf)	247
9.1	The Coroutine Module	247
9.2	The Coroutine Class Definition	247
9.3	Coroutine Functions	248
10	Character Sets (cset.hhf)	251
10.1	Predicates (tests)	251
10.2	Character Set Construction and Manipulation	259
10.3	Set Operations	267
11	Date Functions (datetime.hhf)	279
11.1	The Date Module	279
11.2	Date Data Types	279
11.3	Date Tables	280
11.4	Date Predicates	281
11.5	Date Conversions	283
11.6	Date Arithmetic	286
11.7	Reading the Current System Date	289
11.8	Date Output and String Conversion	290
11.9	Date Class Types	291
11.9.1	Date Class Methods/Procedures	292
11.9.2	Creating New Date Class Types	293
11.9.3	Date Class Functions	297
12	Environment Variables Module (env.hhf)	301
12.1	The Env Module	301
12.2	Retrieving Environment Strings	301
13	Exceptions Module (excepts.hhf)	303
13.1	The Exceptions Module	303
13.2	Exception Resource Reduction	303
13.3	Exception Constants	303

13.4	Exception Messages	310
14	File Class Module (fileclass.hhf)	313
14.1	File Class Methods/Procedures	313
14.2	A Quick Note	314
14.3	General File Operations	314
14.4	Opening and Closing Files	315
14.5	File Predicates	316
14.6	Miscellaneous Output	317
14.7	Character, Character Set, and String Output	318
14.8	Hexadecimal Numeric Output	319
14.9	Signed Integer Numeric Output	323
14.10	Unsigned Integer Numeric Output	326
14.11	Floating-Point Numeric Output Using Scientific Notation	329
14.12	Floating-Point Numeric Output Using Decimal Notation	330
14.13	Generic File Output	332
14.14	Generic File Input	333
14.15	Character and String Input	333
14.16	Signed Integer Input	334
14.17	Unsigned Integer Input	336
14.18	Hexadecimal Input	337
14.19	Floating-Point Input	339
14.20	Generic File Input	339
15	The File I/O Module (fileio.hhf)	341
15.1	Conversion Format Control	341
15.2	General File I/O Functions	341
15.3	File Output Routines	354
15.3.1	Miscellaneous Output Routines	354
15.3.2	Character, String, and Character Set Output Routines	358
15.3.3	Hexadecimal Output Routines	365
15.3.4	Signed Integer Output Routines	388
15.3.5	Unsigned Integer Output Routines	402
15.3.6	Floating Point Output Routines	416
15.3.6.1	Real Output Using Scientific Notation	416
15.3.6.2	Real Output Using Decimal Notation	420
15.3.7	Generic File Output Routine	424
15.4	File Input Routines	425
15.4.1	General File Input Routines	425
15.4.2	Character and String Input Routines	428
15.4.3	Signed Integer Input Routines	430
15.4.4	Unsigned Integer Input Routines	434
15.4.5	Hexadecimal Input Routines	437
15.4.6	Floating Point Input	442
15.4.7	Generic File Input	443
16	The File System Module (filesys.hhf)	445
16.1	Filename and Pathname String Functions	445
16.2	Directory and File Predicates	461

16.3	File Information Functions	462
16.4	Directory and File Manipulation Functions	463
17	HLA Related Macros and Constants (hla.hhf)	469
17.1	The HLA Module	469
17.2	Classification Macros	469
17.3	String to Integer Macros	470
17.4	Label Generation Macro	470
17.5	Procedure Overloading Macro	470
17.6	Generic PUT Macro	473
17.7	@class Constants	478
17.8	HLA pType Constants	479
17.9	@pclass Return Values	481
17.10	@section Return Values	482
18	The Linux Module (linux.hhf)	485
18.1	The Linux Module	485
18.2	The Linux Header File	485
19	Lists Module (lists.hhf)	487
19.1	The Lists Module	487
19.1.0.1	List Data Types	487
19.2	List_t Class Function Types	489
19.3	Creating New List Class Types	490
19.4	List Procedures, Methods, and Iterators	491
19.5	List Constructor and Destructor	492
19.6	Accessor Functions	493
19.6.0.1	Adding Nodes to a List	493
19.7	Removing Nodes From a List	495
19.8	Accessing Nodes in a List	497
19.9	Miscellaneous List Functions	499
20	Math Module (math.hhf)	503
20.1	The Math Module	503
20.2	Math Data Types	503
20.3	64-Bit Arithmetic and Logical Operations	503
20.4	128-Bit Arithmetic and Logical Operations	511
20.5	Transcendental, Logarithmic, and Other Floating-Point Operations	520
21	Memory-Mapped I/O (mmap.hhf)	547
21.1	MMAP Module	547
21.2	Class Fields	547
21.3	Class Procedures and Methods	547
22	Memory (memory.hhf)	551
22.1	Memory Module	551
22.2	Deprecated Names	551
22.3	Generic Memory Allocation	551
22.4	String Memory Allocation	558
23	OS Module (os.hhf)	561

23.1	The OS Module	561
23.2	Executing Shell Commands.....	561
23.3	Delaying Program Execution.....	562
24	Patterns Module (patterns.hhf)	563
24.1	The Patterns Module	563
24.2	An Introduction to Pattern Matching (a tutorial).....	563
24.3	Pattern Matching Functions Versus User Code.....	567
24.4	Register and Stack Usage in Pattern Matching Statements.....	568
24.5	Nesting Pattern Matching Statements	570
24.6	Cleanly Nesting Patterns	574
24.7	Backtracking	576
24.8	Pattern Components.....	578
24.9	Lazy / Eager Evaluation and Pattern Matching Performance	579
24.10	Regular Expressions	580
24.11	Pattern Matching Statements	585
24.12	Alternation	586
24.13	Pattern Matching Macros.....	587
24.14	Character Set Matching Functions.....	590
24.15	Character Matching Functions.....	595
24.16	Case Insensitive Character Matching Routines	600
24.17	String Extraction Functions	606
24.18	Whitespace and End of String Matching Functions	607
24.19	Matching an Arbitrary Sequence of Characters.....	608
24.20	Writing Your Own Pattern Matching Routines.....	609
25	Random Number Generator Module (rand.hhf).....	621
25.1	The Random Module	621
25.2	The Random Number Generators	621
26	Sockets Module (sockets.hhf).....	625
26.1	The SOCK Module	625
26.2	Socket Initialization and Cleanup	625
26.3	Generic Socket Functions	625
26.4	Low-Level BSD-Style Socket Functions.....	626
26.5	Socket Classes	634
26.6	A Quick Note.....	635
26.7	Client/Server Applications Using the Socket Classes	635
26.8	A Simple Server Application.....	635
26.9	A Simple Client Application	638
26.10	Client/Server Communication	638
26.11	General Socket Class Operations.....	639
26.12	Miscellaneous Output	642
26.13	Character, Character Set, and String Output	643
26.14	Hexadecimal Numeric Output	645
26.15	Signed Integer Numeric Output.....	649
26.16	Unsigned Integer Numeric Output.....	652
26.17	Floating-Point Numeric Output Using Scientific Notation	654
26.18	Floating-Point Numeric Output Using Decimal Notation.....	656

26.19	Generic File Output	657
26.20	Generic File Input	658
26.21	Character and String Input	659
26.22	Signed Integer Input	660
26.23	Unsigned Integer Input	661
26.24	Hexadecimal Input	663
26.25	Floating-Point Input	664
26.26	Generic File Input	665
27	The Standard Error Module (stderr.hhf)	667
27.1	Conversion Format Control	667
27.2	File I/O Routines and the Standard Error Handle	667
27.3	Standard Error Routines	667
27.4	Miscellaneous Output Routines	668
27.5	Boolean Output	669
27.6	Character, String, and Character Set Output Routines	670
27.7	Hexadecimal Output Routines	676
27.8	Signed Integer Output Routines	698
27.9	Unsigned Integer Output Routines	711
27.10	Floating Point Output Routines	725
27.10.1	Real Output Using Scientific Notation	725
27.10.2	Real Output Using Decimal Notation	728
27.11	Generic Error Output Routine	733
28	The Standard Input Module (stdin.hhf)	735
28.1	Conversion Format Control	735
28.2	File I/O Routines and the Standard Output Handle	735
28.3	Standard Input Routines	735
28.4	General Standard Input Routines	736
28.5	Character and String Input Routines	738
28.6	Hexadecimal Input Routines	739
28.7	Signed Integer Input Routines	742
28.8	Unsigned Integer Input Routines	744
28.9	Floating Point Input	747
28.10	Generic File Input	747
29	The Standard Output Module (stdout.hhf)	749
29.1	Conversion Format Control	749
29.2	File I/O Routines and the Standard Output Handle	749
29.3	Standard Output Routines	749
29.4	Miscellaneous Output Routines	750
29.5	Boolean Output	751
29.6	Character, String, and Character Set Output Routines	752
29.7	Hexadecimal Output Routines	759
29.8	Signed Integer Output Routines	781
29.9	Unsigned Integer Output Routines	794
29.10	Floating Point Output Routines	807
29.10.1	Real Output Using Scientific Notation	807
29.10.2	Real Output Using Decimal Notation	810

29.11	Generic Standard Output Routine	815
